PROFESSIONAL SUMMARY

Software Engineering undergraduate and aspiring frontend developer with hands-on experience building responsive web interfaces using React, JavaScript, HTML, CSS, Vite, and Axios. Comfortable integrating REST APIs, creating reusable components, and working with Git. Eager to contribute strong problem-solving skills and a user-focused mindset to a frontend development team.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript, React, Vite

Backend awareness: Spring Boot, ASP.NET Core MVC

Tools: Git, GitHub, VS Code, Visual Studio

Integration: REST APIs, Axios, JSON, Postman

Databases: MySQL, SQL Server

Core strengths: Responsive design, debugging, teamwork

PROJECTS

DonateHub — Donation Management Platform | React, Vite, Axios, Spring Boot, MySQL

- Built responsive pages for browsing donations, registration, organization profiles, and administration workflows.
- Integrated frontend components with REST APIs using Axios and implemented role-specific user experiences.

Hotel ERP System — Room and Reservation Frontend | React, JavaScript, Axios

- Created frontend service functions for room listing, availability, creation, updates, status changes, and deletion.
- Connected the interface to Spring Boot endpoints and tested reservation and room workflows using Postman.

Shared Expense Tracker | ASP.NET Core MVC, C#, SQL Server

- Developed interfaces for managing members and shared expenses, supported by validation and database persistence.

EDUCATION

BSc (Hons) in Software Engineering | NSBM Green University, Sri Lanka

Undergraduate • Relevant study: Web Application Development, Software Architecture, Databases, Algorithms and Data Structures

ADDITIONAL INFORMATION

Languages: English, Sinhala | **Availability:** Internship / Junior Frontend Developer opportunities
